

INTERN PROFILES - JOB POSTINGS

Are you ready to make a difference in the Telecoms world? At ROCCO we have several exciting internship opportunities that will give you the platform to do just that!

About ROCCO

Working with international clients, ROCCO specialises in the telecoms sector with concrete expertise in roaming and interconnect. We have a strong commitment to neutrality and professionalism, allowing us to deliver tailored services for our customers.

With over 25 years of experience in the sector, the team at ROCCO delivers research, education and strategic consulting in a pioneering manner. We are passionate about everything we do, including the development of fellow innovative and creative minds that have the enthusiasm for the industry, and want to join us to help ROCCO grow.

Don't worry if you don't have prior knowledge about roaming and interconnect, or telecoms in general. We'll give you basic training and material, and guide you through the process. It's up to you how much expertise you would like to acquire!

For more information, enter www.rocco.group

Commitment requirements

You will work remotely, specially due to the COVID-19 situation. We use the Zoom platform regularly to connect with the team. Because of this, you will need a personal computer and a reliable internet connection.

You will participate during the first week of your assignment in a training to get familiar to ROCCO's environment and way of working.

While you'll receive guidance and training, we expect that you are proactive and willing to learn about the industry. Many people with no prior experience or knowledge on telecoms have started a career in this sector.

Working times are flexible (morning, afternoon or mixed). We just ask you to decide when will you be available and stick to that choice as much as possible. It's important that your working times align with team members who are giving you guidance.

Personal and professional benefits

The student will have the opportunity to discover the telecoms industry and start a career in this exciting field.

Within our multidisciplinary team, we do regular training sessions for everyone to understand better the wider industry and the many different topics in it.

We recently launched an online learning platform with several courses which would be available to the students for the duration of the internship.

The most important thing is that you are committed to learning about this amazing industry.

PROFILE 1: Research Intern

Overview:

To conduct research and creating training courses on key industry trends. We are looking for up to 4 interns to fulfil these roles.

Responsibilities and duties:

To research telecoms / tech information online on these topics. The intern can choose to study one of these 13 research areas:
